

Vaibhav Kumar

Product Manager · I learn the user where they work, then ship

Bangalore, India | +91 8742946325 | vaibhav.ky.2003@gmail.com | Portfolio: sherlyguides.github.io/portfolio/vyapar | github.com/SherlyGuides

SUMMARY

Product manager who builds for busy, non-technical users working in rough conditions. Took Lerno from a content player to a teaching assistant used at 100+ schools by sitting in live classes, shipping about two features a day, and cutting whatever didn't earn its place. Designed for patchy internet (offline sessions, light files), phone-number sign-in and WhatsApp-first communication, and built internal tools that cut production effort by 70–95%. Engineer by training (DTU). I want to bring the same field-first approach to the owners and staff of India's small businesses.

EXPERIENCE

Product Manager — Eduvantage Innovations (Think Pro Academy) Bangalore · Feb 2026 – Present

- **Owned Lerno end to end, from simple content player to teaching assistant used by 100+ schools.** Ran customer research in classrooms and delivery sessions; every feature involved at least one teacher's feedback and was agreed with founders and stakeholders. Shipped ~2 features a day with Claude Code, tested fast, and removed anything that added clutter. Direction: less for the teacher to operate, not more.
- **Removed friction for users who aren't tech-first:** offline sessions for unreliable school internet, phone-number sign-in, tick-off parts lists for in-class builds, and plain-English activity logs for non-technical reviewers.
- **Drove adoption across ~100 schools on WhatsApp:** automated teacher readiness with the WhatsApp Business API (voice recognition, progress tracking, escalation), so teachers were ready before class.
- **Built internal products that changed how the company runs:** automated content production, lifting efficiency ~70% on PPTs and ~95% on animated videos, and created a 3D (GLB) content stream the company did not have before. Automated book production end to end: AI-generated content and images, Python formatting, and image-to-text model reviews in one pipeline.
- **Shipped tools for low-bandwidth schools:** PPT Splitter sends heavy decks as light PDFs with videos as separate MP4 files; Build Steps turns phone photos into build-instruction decks and parts lists.
- **Built automated quality review for AI-generated lesson content** (reading level, terminology, safety rules), then handed the production pipeline to contract workers outside company retainers, so the company carries no fixed payroll for it.

Founder — 3D Content Studio (freelance) Dec 2024 – Feb 2026

- Approached to make 3D models for Think Pro, starting with Fusion 360 only. Studied the competitor's GLB approach in a day, designed a Blender generation pipeline, and delivered the first model set in 15 days.
- Broke the workflow into repeatable tasks and, by end of December, ran a 4-person remote studio on retainer. The work led to the offer from Think Pro Academy.

Product Engineer — Bramer Pvt Ltd Delhi · Jul – Sep 2025

- Led new product development of an autonomous surveillance drone against a Border Roads Organisation requirements spec; delivered full design and technical documentation in 2 months against a 6-month plan, coordinating design, electronics and airframe teams.

Mechanical Systems Integrator — Yatri Motorcycles Kathmandu · Dec 2024 – Jun 2025

- Teardown analysis across 6 electric two-wheelers found 20% cost-reduction opportunities; topology optimisation cut bracket weight 10–15%; moved project tracking to Teamcenter PLM.

LEADERSHIP

Captain, Team Raftaar (2023–24): led a 30-member team to two consecutive wins at the All-India ASME e-HPVC, running multi-vendor production on a tight budget. Debate and MUN podiums at 9+ colleges; invited judge at QMS, IITM and DTU.

SKILLS

Product: customer research and field observation, discovery, prioritisation and feature cutting, requirements documentation, working prototypes, success metrics, roadmapping, stakeholder alignment across business, delivery and engineering, building internal tools

Build & data: Claude Code, Python (native), SQL, JavaScript/React, WhatsApp Business API, LLM application design, automated evaluation | **Engineering:** Fusion 360, CATIA, SolidWorks, FEA, PLM

EDUCATION

B.Tech, Mechanical Engineering — Delhi Technological University, 2025 | Published, ISME Journal 2024 | Design patent pending, 2023
