SUMMARY

Product manager at Think Pro Academy, where I run Learnio, a classroom app used by teachers at 100+ schools. I spend time in classrooms watching how teachers use it, and ship changes quickly with Claude Code, around two a day. I also built the company's content production pipelines for slides, video, 3D models and books. One of 7 core team members, reporting to the founders. Mechanical engineering graduate from DTU.

EXPERIENCE

Product Manager — Eduvantage Innovations (Think Pro Academy) Bangalore · Feb 2026 – Present

- **Run Learnio**, which started as a content player and is now a teaching assistant used at 100+ schools. I sit in on classes and delivery sessions; every feature involves at least one teacher's feedback and is agreed with the founders and stakeholders. Ship about 2 features a day with Claude Code and remove anything that adds clutter.
- Added offline sessions (school internet is unreliable), phone-number sign-in, parts checklists teachers tick off during builds, and plain-English activity logs for non-technical reviewers.
- Set up teacher readiness for ~100 schools on the WhatsApp Business API, with voice replies, progress tracking and escalation when a teacher falls behind.
- Automated content production: about 70% less effort on PPTs and 95% on animated videos. Started a 3D (GLB) content stream the company didn't have before.
- Automated book production: AI-generated text and images, formatting in Python, and page review with image-to-text models, all in one pipeline.
- Built PPT Splitter, which turns heavy decks into light PDFs with videos as separate MP4s for schools on slow internet, and Build Steps, which makes build-instruction decks and parts lists from phone photos.
- Built automated checks for AI-generated lesson content (reading level, terminology, safety rules). Handed the production pipeline to contract workers, so it adds nothing to fixed payroll.

Founder — 3D Content Studio (freelance) Dec 2024 – Feb 2026

- Approached to make 3D models for Think Pro, starting with Fusion 360 only. Worked out the competitor's GLB approach in a day, designed a Blender generation pipeline, and delivered the first model set in 15 days.
- Broke the workflow into repeatable tasks and, by end of December, ran a 4-person remote studio on retainer. The work led to the offer from Think Pro Academy.

Product Engineer — Bramer Pvt Ltd Delhi · Jul – Sep 2025

- Led new product development of an autonomous surveillance drone against a Border Roads Organisation requirements spec; delivered full design and technical documentation in 2 months against a 6-month plan, coordinating design, electronics and airframe teams.

Mechanical Systems Integrator — Yatri Motorcycles Kathmandu · Dec 2024 – Jun 2025

- Teardown analysis across 6 electric two-wheelers found 20% cost-reduction opportunities; topology optimisation cut bracket weight 10–15%; moved project tracking to Teamcenter PLM.

LEADERSHIP

Captain, Team Raftaar (2023–24): led a 30-member team to two consecutive wins at the All-India ASME e-HPVC, running multi-vendor production on a tight budget. Debate and MUN podiums at 9+ colleges; invited judge at QMS, IITM and DTU.

SKILLS

Product: user research and classroom observation, prioritisation, requirements, prototyping, metrics, roadmaps, working with founders, ops and engineering

Tools: Claude Code, Python, SQL, JavaScript/React, WhatsApp Business API, LLM apps and evaluation | **Engineering:** Fusion 360, CATIA, SolidWorks, FEA, PLM

EDUCATION

B.Tech, Mechanical Engineering — Delhi Technological University, 2025 | Published, ISME Journal 2024 | Design patent pending, 2023
