

Vaibhav Kumar

AI Product Manager · I build the product, not just the spec

Bangalore, India (open to remote) | vaibhav.ky.2003@gmail.com | learn.thinkpro.academy | github.com/SherlyGuides

SUMMARY

Product manager with an engineering background who designs, builds and ships AI-driven products end to end. Built Learno, an LMS used by 100+ schools, and cut educational-video production from ~14 days to ~2 hours by redesigning the pipeline around AI generation. Daily user of Claude Code and AI coding tools to prototype and ship working software. Report directly to the founders; one of 7 core team members.

EXPERIENCE

Product Manager — Eduvantage Innovations (Think Pro Academy) Bangalore · Feb 2026 – Present

- **Designed, built and deployed Learno LMS, used by 100+ schools.** React/Three.js classroom player for animated 3D lessons, interactive GLB assembly, PDF, PowerPoint and video; Node/Express API; role-based school, staff and demo accounts with per-school branding; offline sessions for poor school connectivity; plain-English activity logs for non-technical reviewers.
- **Cut video production from ~14 days to ~2 hours per video (~170x)** by rebuilding the pipeline around AI generation, supported by internal tools I built: Fileo Admin (Next.js/TypeScript uploader with BOM/parts-list export), a phone-first build-instruction deck designer, and a PPTX-to-PDF/video splitter.
- **Automated teacher readiness across ~100 schools** with the WhatsApp Business API, voice recognition, progress tracking and escalation.
- **Built automated quality review for AI-generated lesson content:** encoded grade-band reading level, terminology and safety rules as enforced checks, replacing manual review.
- **Ship like a product team:** versioned releases, documented design decisions and changelog, CI with tests and production builds, automatic deploys on merge. 88 commits and two production apps in under four weeks of repo history.
- Hired and trained the animation and 3D production team; own timelines and quality bar for all animated and 3D output.

Product Engineer — Bramer Pvt Ltd Delhi · Jul – Sep 2025

- Led new product development of an autonomous surveillance drone against a Border Roads Organisation SRS; delivered complete design and technical documentation in 2 months against a 6-month plan, coordinating design, electronics and airframe teams.

Mechanical Systems Integrator — Yatri Motorcycles Kathmandu · Dec 2024 – Jun 2025

- Ran teardown analysis across 6 electric two-wheelers, identifying 20% cost-reduction opportunities; cut bracket weight 10–15% via topology optimisation; moved project tracking to Teamcenter PLM.

Earlier — Ezinore (Product Designer), Indian Oil Corporation (Project Intern) 2023 – 2024

- Modelled power modules and windmill assemblies with FEA, concept to market in 2 months; authored a 120-page technical report on pumps and valves.

SELECTED PROJECTS

Learno LMS — live at learn.thinkpro.academy. React 19, Vite, React Three Fiber, Express, PM2, nginx, Cloudflare. Deliberate product calls documented in the design notes (e.g. phone-number sign-in to record who uses the player, not to gate content).

Build Steps (github.com/SherlyGuides/build-steps) — phone-first web app that turns step photos and a parts library into PowerPoint build-instruction decks and BOMs.

PPTX Splitter (github.com/SherlyGuides/pptx-splitter) — Python tool that converts decks to PDFs and splits embedded videos into separate files.

LEADERSHIP

Captain, Team Raftaar (Dec 2023 – Dec 2024): led a 30-member team to two consecutive wins at the All-India ASME e-HPVC design competition; ran multi-vendor production on a constrained budget. Debate and MUN podium finishes across 9+ colleges; invited judge at QMS, IITM and DTU.

SKILLS

Product: discovery, roadmapping, PRDs, prioritisation, cross-functional execution, process automation, hiring and team design

AI & build: Claude Code, LLM application design, agent/tool workflows, automated evaluation, API integration, WhatsApp Business API, Python, JavaScript/TypeScript, React, Node.js, SQL

Engineering: CATIA, Fusion 360, SolidWorks, FEA/CAE, PLM, rapid prototyping, 3D printing

EDUCATION

B.Tech, Mechanical Engineering — Delhi Technological University, 2025 | Published, ISME Journal 2024 | Design patent pending (recumbent bicycle), 2023
