

Vaibhav Kumar

AI Product Manager · I start with the teacher in the classroom, then build

Bangalore, India (open to remote) | vaibhav.ky.2003@gmail.com | learn.thinkpro.academy | github.com/SherlyGuides

SUMMARY

Product manager who learns the user first and ships fast with AI tools. Built Learno, a classroom content player that grew into a teaching assistant for teachers at 100+ schools, by sitting in live classes, watching teachers teach, and shipping about two features a day, then cutting whatever didn't earn its place. Also built the 3D, video, PPT and book production pipelines behind the content. One of 7 core team members, reporting to the founders.

EXPERIENCE

Product Manager — Eduvantage Innovations (Think Pro Academy) Bangalore · Feb 2026 – Present

- **Took Learno from a simple content player to a teaching assistant used by 100+ schools.** Sat in classrooms and delivery sessions; every feature involved at least one teacher's feedback and was agreed with founders and stakeholders. Shipped ~2 features a day with Claude Code, tested fast, and removed anything that added clutter. Direction: less for the teacher to operate, not more.
- **Removed friction from running a class:** offline sessions for unreliable school internet, phone-number sign-in, parts lists teachers tick off during builds, and plain-English activity logs for non-technical reviewers.
- **Automated content production company-wide:** efficiency up ~70% on PPTs and ~95% on animated videos. Created a new 3D (GLB) content stream the company did not have before.
- **Automated book production end to end:** content and images generated with AI, formatting done in Python, reviews done by image-to-text models, all synchronised into one pipeline.
- **Built internal tools for low-bandwidth schools:** PPT Splitter sends heavy decks as light PDFs with videos as separate MP4 files; Build Steps makes build-instruction decks and parts lists from phone photos.
- **Built and delegated the full production pipeline** to contract workers outside company retainers, so the company carries no fixed payroll, freeing my time to focus on the player.
- **Automated teacher readiness across ~100 schools** (WhatsApp Business API, voice recognition, progress tracking, escalation) and built automated quality review for AI-generated lesson content (reading level, terminology, safety rules).

Founder — 3D Content Studio (freelance) Dec 2024 – Feb 2026

- Approached to make 3D models for Think Pro, starting with Fusion 360 only. Identified the competitor's GLB approach in a day, designed a Blender generation pipeline, and delivered the first model set in 15 days.
- Broke the workflow into repeatable tasks and, by end of December, ran a 4-person remote studio on retainer. The work led to the offer from Think Pro Academy.

Product Engineer — Bramer Pvt Ltd Delhi · Jul – Sep 2025

- Led new product development of an autonomous surveillance drone against a Border Roads Organisation SRS; delivered full design and technical documentation in 2 months against a 6-month plan, across design, electronics and airframe teams.

Mechanical Systems Integrator — Yatri Motorcycles Kathmandu · Dec 2024 – Jun 2025

- Teardown analysis across 6 electric two-wheelers found 20% cost-reduction opportunities; topology optimisation cut bracket weight 10–15%; moved project tracking to Teamcenter PLM.

LEADERSHIP

Captain, Team Raftaar (2023–24): led a 30-member team to two consecutive wins at the All-India ASME e-HPVC, running multi-vendor production on a tight budget. Debate and MUN podiums at 9+ colleges; invited judge at QMS, IITM and DTU.

SKILLS

Product: user research, classroom observation, discovery, prioritisation and feature cutting, roadmapping, stakeholder alignment, process automation, hiring and delegation

AI & build: Claude Code, LLM application design, agent workflows, automated evaluation, WhatsApp Business API, Python (native), JavaScript/React, Blender scripting, SQL | **Engineering:** Fusion 360, CATIA, SolidWorks, FEA, PLM, 3D printing

EDUCATION

B.Tech, Mechanical Engineering — Delhi Technological University, 2025 | Published, ISME Journal 2024 | Design patent pending, 2023
